

Background

Part of a £6 million new build, this public library is housed on the ground floor. This library needed to be fresh, modern, bright and contemporary with defined areas worked into the design using furniture.

The Challenge

The theme was to create synergy throughout the library by using curves. The reception area needed to be bold and welcoming but tailored specifically for the client.

Solution

Gloss white laminate was the material of choice for desking, IT furniture, benching, shelving and features. Bright vibrant colours were to be used to distinguish between areas, with purple as the colour chosen for the main library in keeping with the exterior of the building.

The curved theme was achieved with 40mm thick white laminate with panels and contrasting edging defining key areas.

This project required a 100% bespoke solution.
